

Pair Reflection (5–7 sentences)

Discuss:

- What each partner contributed
- What challenges you encountered
- What you learned about CBR

Being a solo project, I have contributed to all aspects of the program and documentation. The biggest challenge was deciding which problem factors and solution factors to include in the cases. I had lacking initial knowledge of which solutions lawyers need and which common problem factors their cases have. The second most difficult is deciding the weights of each problem factor, as I found them to be arbitrary, so I had to make them as sound as possible. The formulas are also quite challenging to visualize. Doing this Technical Assessment, it was revealed to me that AI does not need to be complicated neural networks or heavy language processing units; it can be as simple as connecting cases and adjusting parameters, such as in CBR.
